

BUNDLE BREAKER III

A proven design

The Nicked Bundle Separator provides boxmakers with the increased performance demanded by rotary die cutter lines.

Position sensing of the controls and reduced platen travel result in optimized overall line performance.

BUNDLE BREAKER III

A proven design

Large windowed panels provide visibility into the breaking zone.

Segmented floating platen design allows true multiple-across breaking performance for bundles with slightly unequal heights.

Smooth plastic conveyor surface for added bundle control.

Powered tilting infeed conveyor provides quick and easy personnel access to the other side of the line.

Color touchscreen interface is intuitive and reduces set-up times.
